Thanks also to our testers and others who provided support:

Jeff Miller
S. Barnard

Lisa
RedR

Shadowhawk

An extra special thanks to **Ewald the Unimaginative** for his blueprint resref updater utility.

Special thanks goes to **Maximus_IGN** for his support with NWVault and to **Grumalg** for his ERF updater and for allowing us to use his Placeables with a Twist v0.42 hakpak as a starting point for the cepplace.hak. Special thanks go to **Zibli** for allowing us to use his Realms of DragonReach Creature hakpak as a starting point for the cepcreature.hak

Any problems with the CEP or anything we broke in converting those haks to the CEP is our fault, not theirs.
